Quiz 10 (Password): pair - Sunday

## CSC106 - Group Norms and Team Contract

Group Member Names:

- **Donavan Francis**
- **Christine Adeyefa**

The objective of this activity is for your group to decide upon group norms and craft a team contract. Your entire group should come to a consensus about these items.

Submit the link to this document as part of your quiz for today. Also share the link with everyone in your group.

Note that part of your final project grade will be the effort you put into your project.

Decisions (How will they be made? Majority, consensus, other?)

**Most decisions will probably be made using brainstorming and then consensus after we discuss the positives and negatives of whatever the case is.**

Attendance (What are your expectations for the frequency and type of attendance for work outside of class/lab time?; What are legitimate reasons for missing? What do missing members have to do to make up for missed meetings)

**Most meetings will likely be on Tuesday's, Thursday's, or Friday's**

**I am a part of the track team and practice everyday of the week directly after class, so I am usually not available until around 7 pm, but I can stay on campus and work at the library**

**until 9 or 10 pm. I can also try to work on mornings before 12 on Mondays and Fridays.  
(DF)**

I have tutoring everyday till 6 and on Wednesdays I have a meeting from 7-9 so I can work any day except Wednesday after 6.

Assignments (How will assignments be made? How will the group deal with members who do not complete (or poorly complete assignments?)

**We will draft a rough outline of what it takes to complete the final project and then break down the steps into deadlines. Once we have a better idea of the game that we're going to be creating, it will also be easier to assign roles as to who does what part of the game. For example, someone can be assigned creating the background of the game while the other is assigned creating character movement.**

Participation (How will you communicate and share information; How will you ensure full participation of everyone? How will you honor member strengths and interests)?

**Most information will be shared via google document or through group meetings. Due to there only being two of us, it shouldn't be hard to find some point in our days that suits both of us so that we can meet. We just have to recognize that we both have busy schedules and work around that to get the work done.**

Meeting Times and Locations/Mediums (How will you decide on locations and times that suit all members)?

We can work in the library after 7 on Tuesday, Thursday, or Friday

Agenda and SCRUM Meeting Notes (Who will take them and in what format will they be shared?)

**We already have a shared SCRUM document that will be used as meeting notes and can be accessed by the both of us online. During meetings, we can alternate who records the progress that we make on the form and keeps us up to date with all of the information.**

Promptness (What do you expect and how will you handle lateness?)

I don't think lateness is an issue as long as we text letting the other person know.

Conversational Courtesies (How will the team encourage and reinforce active listening, sharing of the airtime, tangents, respectful dialogue, etc )

**When working together, the opinions and ideas of each person will be taken into account and given full importance.**

Enforcement/ Feedback (How will the team enforce its own rules? How do individuals prefer to give and receive feedback?)

We will give feedback keeping the others feelings in mind.

You may add additional norms here.

Work with your partner to write a paragraph describing how you and your partner will use GitHub to share code as you develop your final project. The text of your answer should be the same as the text of your partner's answer, so write the answer together and then each submit it here in this quiz question.

We will both have access to the github repository and should have access to the
